

This is to comment on the recent rumor that K-love may be taken off the FM air. This station is very important to this community as it is one of very few radio stations you can listen to, and not have to worry about what your childrens ears might hear. It is very much appreciated in this community, everywhere you go, restaraunts, doctor's offices, and convenience stores. This radio staion is changing lives all over this country and I believe it serves the most important and highest power of this universe. Thank You!
